**Title:** The Big Melt: Climate Change In the Alps. By: Kluger, Jeffrey, Time, 0040781X, 12/11/2017, Vol. 190, Issue 24**Database:** Academic Search Complete

## The Big Melt: Climate Change In the Alps

Listen American Accent

**Section:**

The Features

It took a long time for the Earth to create the Alps—a lot longer than it's taking humans to wreck them. The Alpine mountain range first rose an estimated 44 million years ago, when the great African plate began creeping northward, breaking and upthrusting the European plate. The newborn peaks did not stop growing until 9 million years ago, and it would be millions more years before the glaciers and snow that are their signature feature would be in place.

Humans have needed barely a century to make a mess of it all. Green and brown, it appears, are the new white across the southern European peaks as **climate change**, which historically has done its most noticeable damage closer to sea level, now reaches higher.

From 1960 to 2017, the Alpine snow season shortened by 38 days—starting an average of 12 days later and ending 26 days earlier than normal. Europe experienced its warmest-ever winter in the 2015—16 season, with snow cover in the southern French Alps just 20% of its typical depth. Last December was the driest in 150 years of record keeping, and the flakes that did manage to fall didn't stay around long. The snow line—the point on a slope at which it's high enough and thus cold enough for snow to stick—is about 3,900 ft., which is a historic high in some areas. But

When writing a research paper, you must cite any information or quotes that did not come from you. Citations direct readers to the complete information regarding the work. Even if you paraphrase information but do not use the exact quote, it must be cited.

The **Cite** tool makes citing information easy by providing formatted citations in a wide range of popular formats, including MLA, AMA, and APA.

To begin, click the **Cite** link in the **Tools** menu of the Detailed Record or Full Text view of your article.

Please note, as citation formats are frequently updated, you should always consult your library resources for exact formatting and punctuation guidelines.

In addition, if you would prefer to export a citation to Bibliographic Management Software such as EndNote or ProCite, you can do this using the **Export** feature, also available in the **Tools** menu. You can also add multiple articles to the folder and Export their citations all at once from within the folder.

The screenshot shows a web browser window titled 'EBSCO Help - Mozilla Firefox' with the URL 'support.ebsco.com/help/index.php?help\_id=7320'. The page features the EBSCOhost logo and a search bar. The main content area is titled 'Citing Articles' and includes a 'Welcome' section with links to various resources, a 'Translation' section, and an 'eBooks and Audiobooks' section. A 'Citing Articles' section explains that users can view citation formats for articles and provides a list of steps to do so. A 'View A Tutorial On This Topic' button is also present. A 'Detailed Record' for the article 'Commodifying Water in Times of Global Warming' is shown, with a 'Cite' button highlighted in a red box. The 'Cite' button is located in the 'Tools' section of the record, which also includes options like 'Add to folder', 'Print', 'E-mail', 'Save', 'Export', 'Create Note', and 'Permalink'.

## Citing Articles

On EBSCO interfaces, when you are viewing an article detail, you can see how the citation for that article should be formatted in a variety of popular citation formats, including MLA, APA, etc.

There are many styles and forms used to cite the sources supporting your research. When using the EBSCO citation tool, please make any necessary corrections before using the citations. Data used to cite electronic sources is not yet standardized; therefore, researchers should review citations carefully. Pay special attention to personal names, capitalization, and dates. Double check your library resources for the exact formatting and punctuation guidelines.

[View A Tutorial On This Topic »](#)

**To view citation formats for an article:**

1. Run a search on EBSCO and view a search result.
2. From the Detailed Record, click the Cite icon.

**Detailed Record**

Commodifying Water in Times of Global Warming.

Authors: STENSRUD, ASTRID BREDHOLT<sup>1</sup>
